

# ITU Project Artiscope

Tomáš Brablec (xbrabl04)  
Abas Hashmy (xhashm00)

- Application for sharing images, inspired by Instagram, Pinterest, etc.
- Primary goal is for users to find other users' art projects for inspiration
- Aimed at creative professionals, art hobbyists, etc.
- More powerful search and filtering options for finding specific content
- Advanced categorization of posts to store found posts in an organized manner

- React + MaterialUI for FE
- Next.js for BE
- LowDB (JSON database) for data storage

- xbrabl04
  - Home page (view of posts + search and filtering)
  - Create post page
  - Single post Page (editing of an existing post)
- xhashm00
  - User galleries page (galleries created by the current user)
  - Public galleries page (public galleries by other users)
  - User collections (galleries consisting of a single user's posts (portfolios))
